Creativity Exercises

Convergent to Divergent Thinking

- The goal of divergent thinking is to generate many different ideas about a topic in a short period of time.

- It involves breaking a topic down into its various component parts in order to gain insight about the various aspects of the topic.

- Divergent thinking typically occurs in a spontaneous, free-flowing manner, such that the ideas are generated in a random, unorganised fashion.

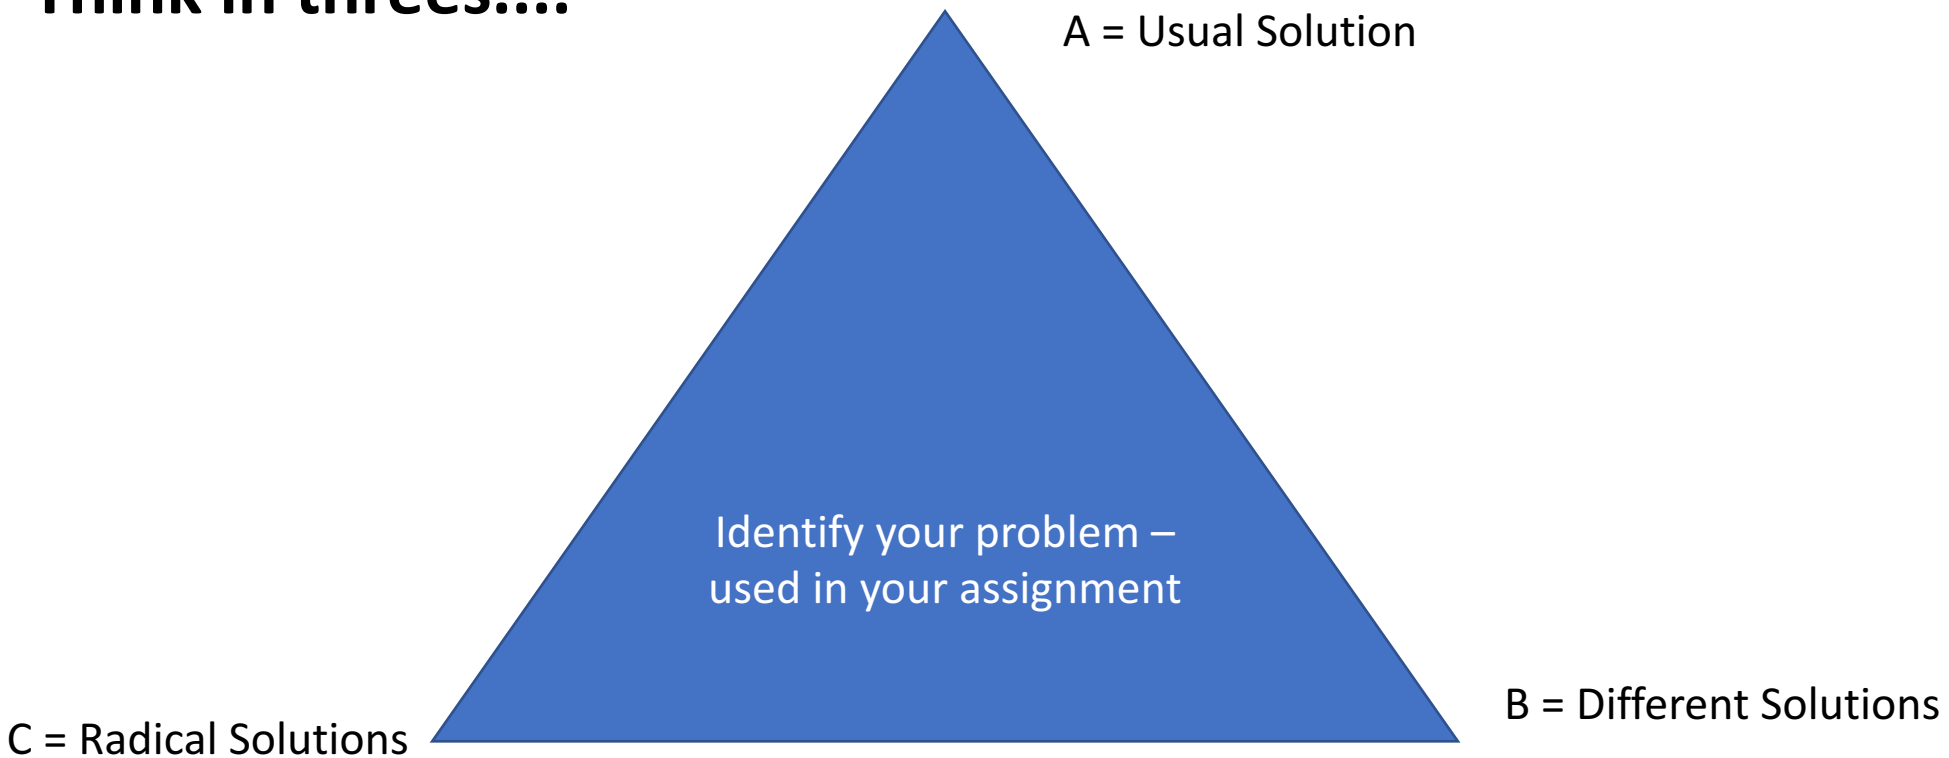
Convergent to Divergent Thinking

- You have 60 seconds. Write your responses to this question on a piece of paper.

- How many uses can you think of for a **paper clip ?**

Convergent to Divergent Thinking

- **Think in threes....**

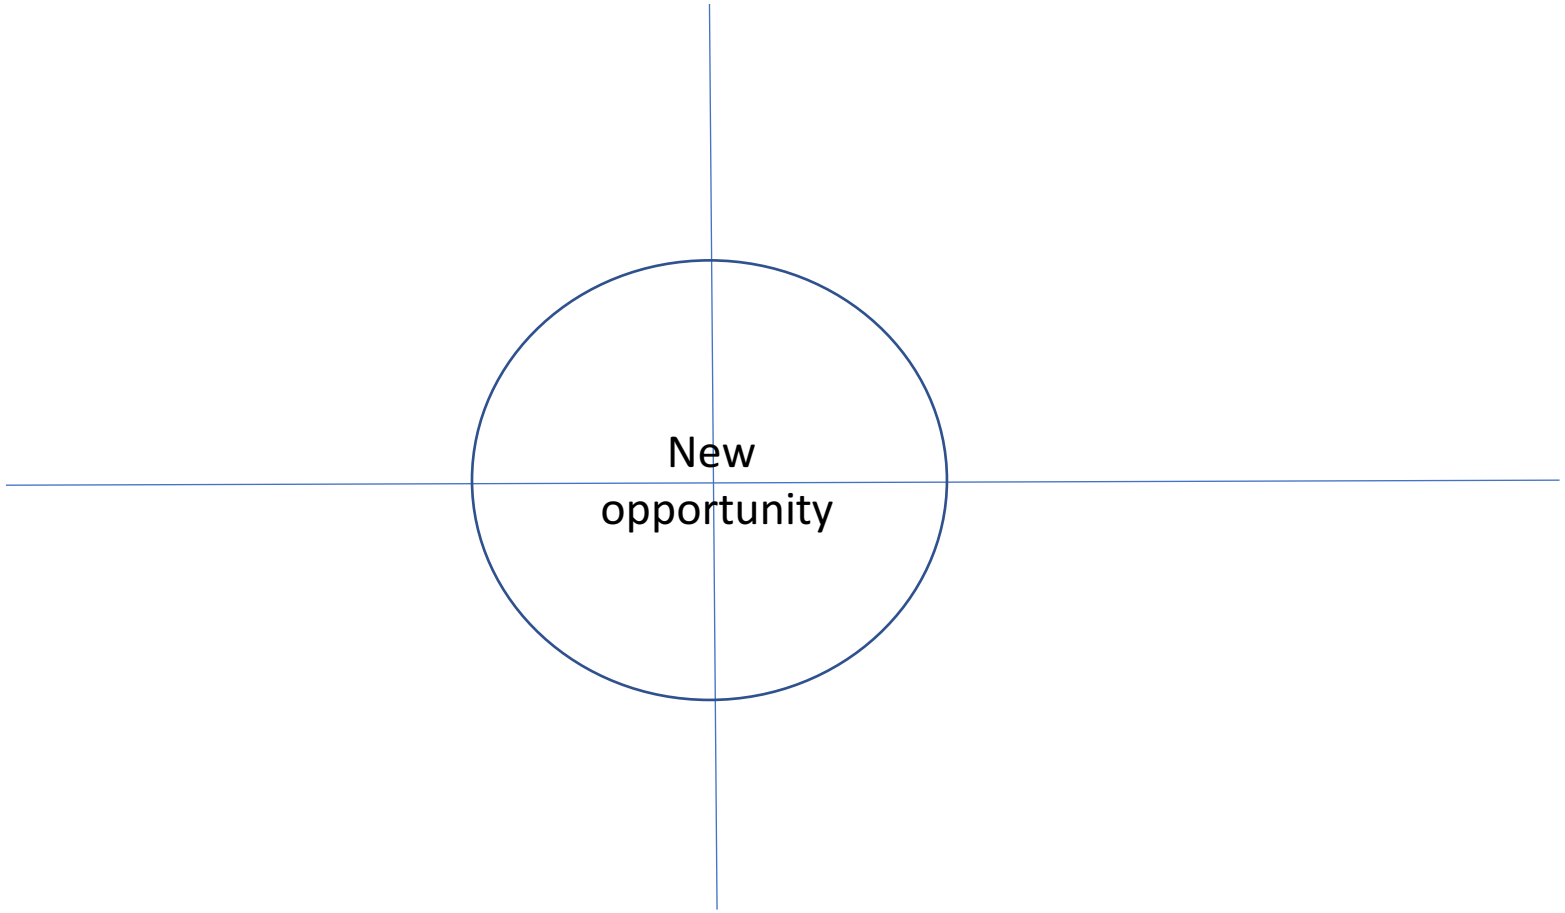


Asking new questions

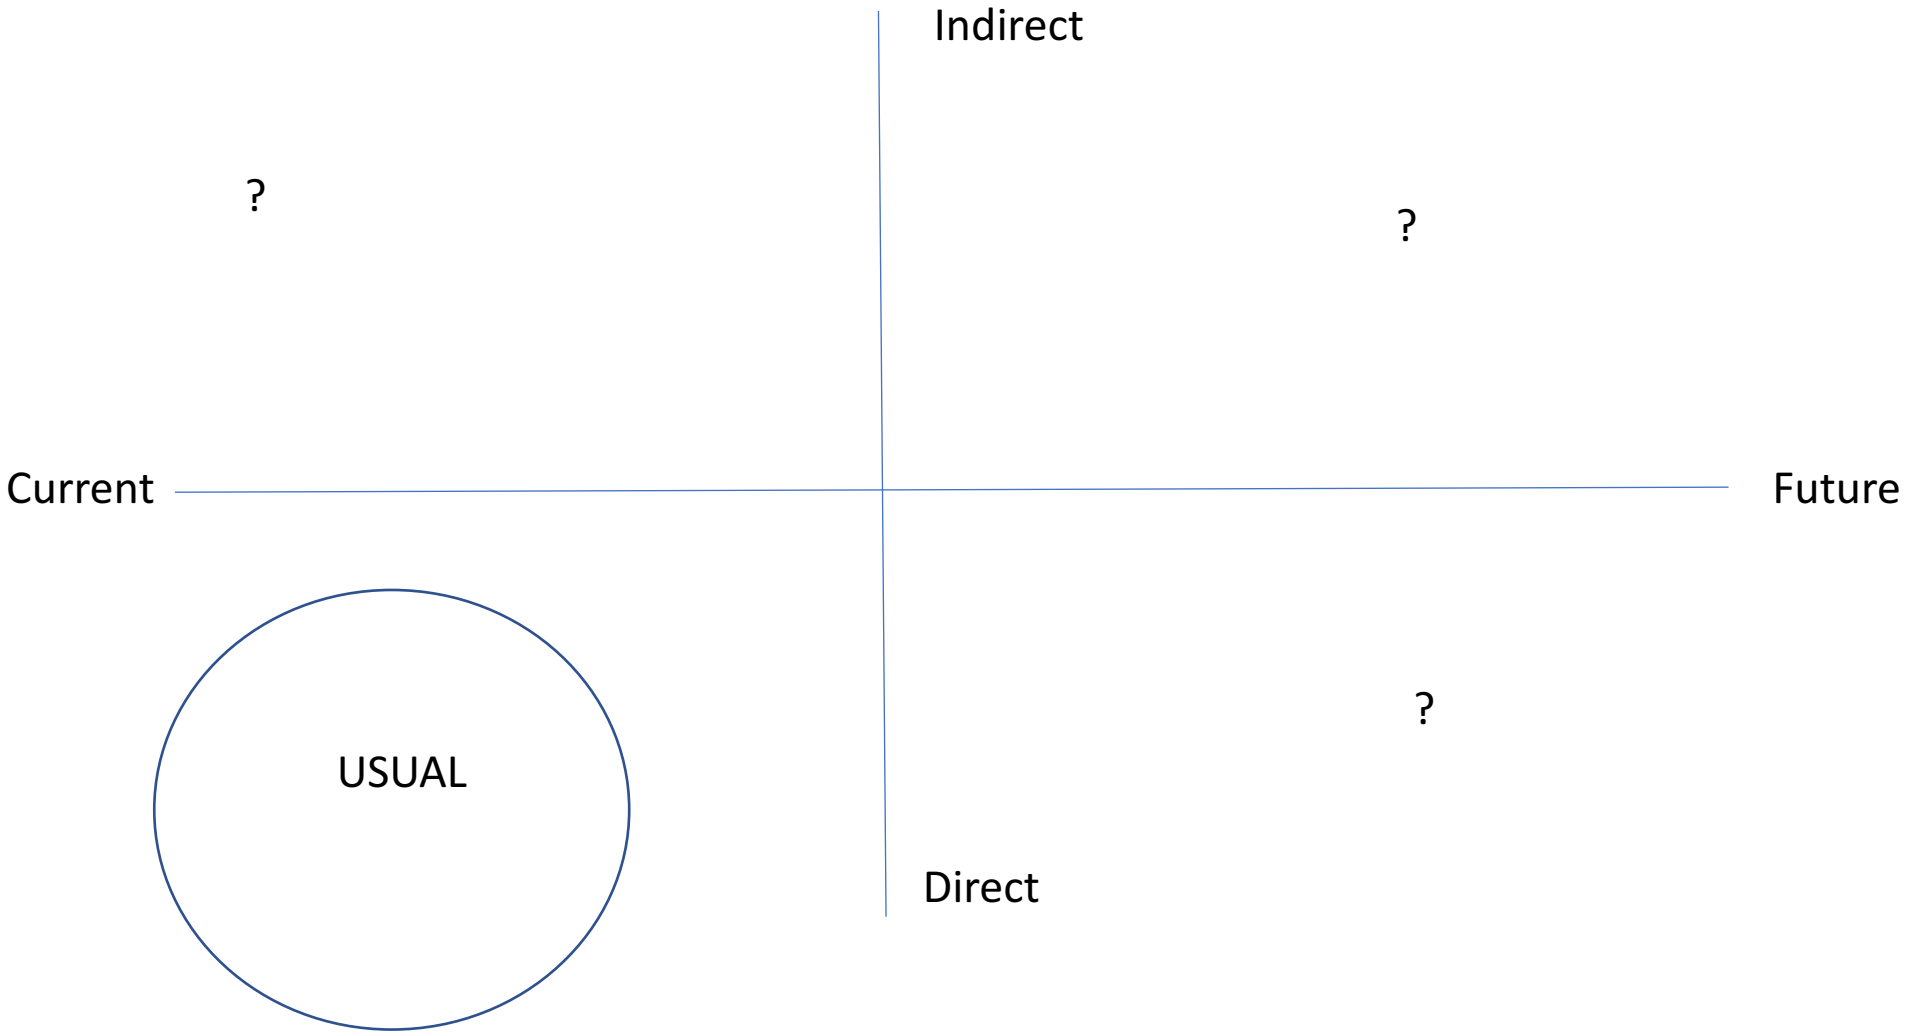
- Select a problem.
- In 2 minutes write all the existing questions you can think of about this problem.

- Now try and think of at least 5 new and varied questions
- (no solutions – focus on asking interesting questions)

Place 2 unrelated things together



Who are your future competitors?

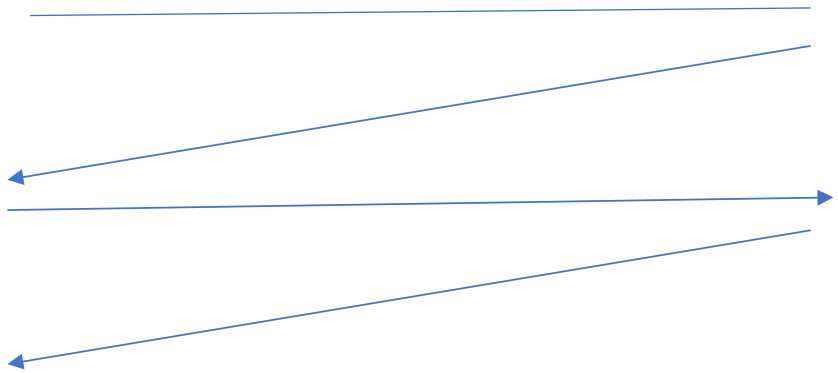


Speed Thinking

Idea Ping-pong..

The group challenge:
How can we raise money while we enjoying ourselves?
30 seconds to develop an idea…

Group 1 Group 2



Bouncing off each others ideas

Speed Thinking

Mind Map at speed

Give your original problem (use in the mind map exercise) to your partner – to come up with 6 different Ideas in 2 minutes…
