Tutorial Week 10

AGILE INNOVATION

MACQUARIE University

* is a term used to describe a series of methods which originated in the field of software development
It involves:

- high-intensity team work (often called scums). Which are self managed.
- Rapid prototyping, testing and learning.
- Methods are more open-ended than traditional project management techniques
- Uses creativity tools such as design thinking
- **2 key roles within Agile innovation:**
  - Team Leader
  - Process Facilitator
